

Day 4

Our day to day started with MSOS where Mr Nick told us all about all the different equipment and medication that the different yachts have on board all depending on the distance it travels, the activities it does and all the different factors that contribute to the kind of first aid kit they have on board.

Thank you to Mr Nick for his generosity of giving us big bags of first aid thing that don't expire such as syringes, bandages etc.

We then moved on to the ship yard Astilleros de Mallorca where we were welcomed by Ms Veli. She took us on a tour around the ship yard and we got to see the workshops, the cranes that can lift up to 25 000 tons!, the material and equipment they used to prevent the chemicals that they use from harming the environment and some of their machinery.

We also had the honour to meet the CEO, Mr Diego Colón and not forgetting Captain Anthony Just!

We then had some lunch trying out new Spanish dishes with Maria, because we were shy to come out of our comfort zone. We then took a drive around with Maria to another part of Palma and got to see a school that starts from crèche to high school but ends at 5pm!, before dashing off to the boat and preparing to head to delicious dinner by Law.
